

Elon Claims Another Scalp: Motorcyclist Killed by “Full Self-Driving” Tesla

Elvis Dunderhoff July 31, 2024

So-called “Full Self-Driving,” which is not full self-driving according to Tesla (they just call it that), must be removed from the market.

This is too much death.

Elon is trying to wipe out the US population so he can replace them with cheap Indians, and he must be stopped before we’re all dead.

AP:

Authorities in Washington have determined that a Tesla that hit and killed a motorcyclist near Seattle in April was operating on the company’s “Full Self Driving” system at the time of the crash.

Investigators from the Washington State Patrol made the discovery after downloading information from the event-data recorder on the 2022 Tesla Model S, agency spokesman Capt. Deion Glover said Tuesday.

“The investigation is still ongoing in this case,” Glover said in an email to The Associated Press. The Snohomish County Prosecutor will determine if any charges are filed in the case, he said.

Tesla CEO Elon Musk said last week that “Full Self Driving” should be able to run without human supervision by the end of this year. He has been promising a fleet of robotaxis for several years. During the company’s earnings conference call, he acknowledged that his predictions on the issue “have been overly optimistic in the past.”

“Overly optimistic” is a sweet way of saying “I’ve been lying to the world and am continuing to do so while the corpses pile up.”

If the “Full Self-Driving” is not finished yet, why are people using it?

The reason is that he’s said for years that it was already finished. Then people started complaining about all of this meaningless death, and he now says “oh well, it’s not actually finished – check the fine print, it’s just a pointless gimmick, you’re not actually supposed to use it, even though we sell it.”

.@ElonMusk said that @Tesla Full Self-Driving 12.5 is "awesome" and on a "whole other level".

FSD 12.5 has been in the hands of the public for less than a week but that's plenty of time for FSD to reveal a litany of safety critical defects.

Elon Musk 
@elonmusk

12.4 is a major improvement. 12.5 is a whole other level
