My research and teaching is largely focused on race, sexuality, ethnicity, gender, ability, nationality, and class in cultural artifacts such as social media, video games, literature, comics, manga, television and film. Major concentrations in my work are portrayals of Black women in media, Women of Color in Media, Black feminisms, feminist theories, feminist film perspectives, visual culture, racialization, global cinema, psychoanalytic theory, technocultural discourse, and the exploitation film genres (grindhouse, blaxploitation, horror, and pornography).

Currently my research is focused on erotic game-play, role-play, sex-work through tabletop role-playing game streams, pornographic social media communication, and Black women positioned as professional public spectacles in BDSM style pornography.

Supervisors: Dr. Tori Omega Arthur (Journalism and Media Communication) & Dr. Jeffrey Snodgrass (Anthropology & Geography)
